## **PREPARATION INSTRUCTIONS FOR ROACH SERVICE**

1. Roaches can be difficult to control without 100% customer cooperation. Following the steps below will help achieve best results.
2. Remove everything from kitchen and bathroom cabinets and drawers. Any food items that have roaches in the container should be discarded. All shelving paper needs to be removed. Place all the removed items in another room
3. Clean all the shelves and drawers prior to service NOT AFTER.
4. All residents, tenants and pets may not re-enter the structure for 2-4 hours after each treatment.
5. All pets must be removed during the service. Cover fish tanks with a damp towel and turn off
6. After you re-enter, vacuum up all the dead and live roaches you find. When all vacuuming is finished, discard the vacuum bag in an outdoor trash container.
7. These steps must be completed for both services. We will return for a 2nd treatment in approximately 30 days.
8. Heat sources are common harborage areas for roaches. Therefore, remove any furnishings near heat sources in the kitchen and bathrooms.
9. You may not want to put everything back into the rooms since all the preparation work will need to be done before we return and do the final treatment in 30 days.

**PETS:** All pets must be removed during the service.

Cover fish tanks with a damp towel and turn off all the pumps to the tank.

### **PLEASE NOTE:**

Roaches are difficult to control and your cooperation and efforts are required. All preparation work needs to be completed in order to get the best possible treatment. If not properly prepped Absolute Pest Control will not complete the service. It takes time to eliminate roaches and results are not immediate. You may still see roaches for up to 30 days.
